About Kinetic

We are the UK's leading supplier of event management and student accommodation software to the higher education sector. Our team of 75 people work out of our Milton Keynes (HQ) and Ludlow offices in the UK and from our US office, generating annual revenues of around £10m; we're growing at around 15% per annum. We're owned by Constellation Software Inc., one of the largest software groups in the world, providing fantastic opportunities for benchmarking, sharing best practice and learning.

Kinetic proudly supports 84% of UK and Irish universities, 60 universities in North America, as well as unique venues such as Lords Cricket Ground and the Merlin Group with our deep and powerful software offering. The culture at Kinetic is one of passion, drive and fun where everyone pulls together to deliver an outstanding customer experience, growth and profit.

At Kinetic, we constantly strive to find the right people and provide all the tools and support to allow us to develop both personally and professionally. We are looking for bright and dynamic individuals who can bring energy and enthusiasm to a demanding role within a rapidly growing and successful company.

We support personal development and build on individual strengths, providing options for career progression across our business. Our core values are to **Empower** our **Community** to **Innovate** and **Evolve**.

Summary

Currently, Kinetic supply traditional client/server enterprise software hosted either on-premises by the customer or by us in Microsoft Azure. We are now in the process of

reimagining our product set to a web-based, multi-tenant Software as a Service (SaaS) cloud solution built in Amazon Web Services.

We are seeking a highly skilled and experienced Senior Front End Fullstack Engineer to join our team. The ideal candidate will have a strong background in React and experience with full stack development.

Responsibilities include

- Line management, mentoring and supporting of a small team.
- Develop and maintain user-friendly and responsive web applications using React.
- Collaborate with back-end developers and designers to integrate front-end and back-end functionality.
- Write clean and efficient code and ensure the code is scalable and maintainable.
- Stay up to date with new trends and technologies in front-end development.
- Provide technical leadership and mentorship to other members of the development team.
- Identify and resolve performance and scalability issues

Essential skills

- Develop and maintain user-friendly and responsive web applications using React
- Collaborate with back-end developers and designers to integrate front-end and back-end functionality.
- Write clean and efficient code and ensure the code is scalable and maintainable.
- Stay up to date with new trends and technologies in front-end development.
- Provide technical leadership and mentorship to other members of the development team.
- Identify and resolve performance and scalability issues.
