

Take student experiences to the next level

Meet Student Web: Our student-facing portal that takes the stress away from their university applications. From signing contracts to getting the accommodation they want, they can take care of everything they need to get up and running, and connect their data with your overarching student management in KxStudent.

How it works:

A multi-function portal

Bring together accommodation applications, payments, contracts and much more, on a single platform that's easy for students to use.

Direct back-office connection

All data and interaction with Student Web feeds into their profiles within KxStudent, from where you can manage the entire student journey.

Branding options

Student Web comes with a range of web design options and configurations, so that it blends in seamlessly with the rest of your digital footprint for a fully professional look.

Flexible and configurable

Tailor your solution with your occupancy data's and pricing, and adjust text, images and email content to present your accommodation in the best positive light.

How it helps you

Better student experiences

Give students the feelgood factor and build a positive first impression by helping them secure the accommodation they want with ease.

Simpler applications and allocations

Progress bars, filtering options and comprehensive data makes it faster and easier to process applications and allocate accommodation.

Payment integration

Optional integration with our KxPayments solution means you can automatically take payments by card, money transfer, open banking and mobile wallets.

Stand out from the crowd

Integrate maps, local facilities, images and student reviews to put your university a cut above the competition in the service you deliver.

Consistent data

Direct connection with the KxStudent back-office system ensures a single source of truth and cuts out errors caused by duplication.

Save staff time

Student Web naturally takes care of many of the common queries students have when applying, saving your team vital time to focus on other key tasks.

Reduce paper waste

By enabling digital contract signing, you can eliminate printed contracts, helping you cut your carbon footprint and save on printing and postage costs.

Secure and compliant

Student Web is fully compliant with GDPR, so you can be sure that sensitive student data is kept safe, and that you have the right permissions to access and store that data.
